### **ALLOWANCE**

1. This action is responsive to the following communication: the Amendment filed on 4/20/10.

#### **Allowable Subject Matter**

2. Claims 1-34 are allowed.

The following is an examiner's statement of reasons for allowance:

- Independent claims 1, 20, 21, 33, when considered as a whole, are allowable over the prior art of record. Specifically, prior art of record fail to clearly teach or fairly suggest the following limitation:

a tracking symbol movable within the control in a tracking state and moving the control when the tracking symbol is in the tracking state and the exterior edge of the peripheral region is encountered and the control is always visible when one of the functions is not activated and always not visible when one of the functions is activated when the tracking symbol is in a down state over the central region of the movable control or entire peripheral region of the movable control.

- Independent claims 22, 29-32 further add the limitations of a pan and zoom control in the tracking menu; therefore, are also allowed.

- Independent claim 19 when considered as a whole, are allowable over the prior art of record. Specifically, prior art of record fail to clearly teach or fairly suggest the following limitations:

the tracking menu boundary surrounding a menu and the controls which are always visible when one of the controls is not activated and always not visible when one of the control is activated when the tracking symbol is in a down state over one of the controls; and the graphical user interface is semi-transparent when any of the functions are not activated,

Art Unit: 2179

transparent when any of the functions are activated when the tracking symbol is in the down state and a function icon replaces the tracking symbol when the functions are activated.

- The dependent claims further add limitations to the allowable subject matter of the corresponding independent claims; thus are also allowable.

The prior art of Leavitt (PGPub # 20020085037) discloses a user definable interface that is displayed in a relative position about the cursor position to substantially reduce cursor commute (e.g., see [0061]). Leavitt teaches the controls are always visible when one of the controls is not activated and always not visible when one of the controls is activated (e.g., see [0030]). However, Leavitt is silent of a tracking control such that the control is moved when the tracking symbol is in the tracking state and encountered the exterior edge of the peripheral region of the control. Regarding claim 19, Leavitt does not teach the graphical user interface is semi-transparent when any of the functions are not activated, transparent when any of the functions are activated when the tracking symbol is in the down state and a function icon replaces the tracking symbol when the functions are activated.

The prior art of Iwema (PGPub # 20040021647) discloses a context menu having a plurality of activatable controls that are displayed at a location of the display device corresponding to a position selectable by a pointer device (e.g., see Figs. 3, 9). Iwema teaches the contextual menu can be draggable using an input device including when the cursor is at the position of the boundary of the menu (e.g., see Fig. 5 and [0043]). However, Iwema is silent regarding whether the context menu is moved when the tracking symbol is in the tracking state and encountered the exterior edge of the peripheral region of the control.

The prior art of Strauss (Patent # 6246411) teaches a menu having a tracking region with tracking boundary, when the tracking symbol encounters an edge of the tracking boundary, moves the menu (e.g., see Fig. 7 and col. 6 lines 59-67). However, Strauss does not disclose

Art Unit: 2179

the control is always visible when one of the functions is not activated and always not visible when one of the functions is activated when the tracking symbol is in a down state over the central region of the movable control or entire peripheral region of the movable control.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
